

# Backend Software Engineer

*Rabat, Morocco | 3 Years of Experience*

## SUMMARY

Reliable and performance-driven Backend Developer with 3 years of experience specializing in server-side architecture, API design, and database management. Proven ability to build scalable backend systems, optimize complex data queries, and implement secure cloud-hosted microservices.

## PROFESSIONAL EXPERIENCE

**Backend Developer — CoreSystems Technology**

*April 2024 – Present (2 years 2 months)*

- Designed, documented, and maintained high-throughput RESTful and GraphQL APIs using Node.js (Express) and Python (FastAPI).
- Optimized relational database schemas and indexed complex SQL (PostgreSQL) queries, reducing server response times by 35%.
- Containerized server-side applications using Docker to ensure identical development and production environments.
- Deployed and managed backend microservices on AWS infrastructure (EC2, RDS, Lambda).
- Utilized Git daily for branching, pull requests, and code reviews within a team of 6 engineers.

**Junior Backend Developer — DataVibe**

*November 2023 – March 2024 (5 months)*

- Assisted in developing business logic and background processing workers using Python.
- Maintained and debugged data migration scripts in SQL server instances.
- Integrated third-party payment gateways and notification APIs into existing web platforms.

## SKILLS

- **Backend Ecosystem:** Node.js, Python (Django, FastAPI), Rest APIs, Microservices.
- **Databases:** SQL (PostgreSQL, MySQL), Redis, MongoDB.
- **Tools & Cloud:** Docker, AWS, Git, Linux, CI/CD pipelines.

## EDUCATION

- Bachelor's Degree in Software Engineering — Mohammadia School of Engineers (EMI) (2023)
