

Sami EL ALAMI

Data Engineer

Casablanca, Morocco | 3 Years of Experience

SUMMARY

Analytical Data Engineer with 3 years of experience building, optimizing, and maintaining scalable data pipelines within cloud-based infrastructures. Proficient in orchestrating robust ETL/ELT workflows, optimizing database models, and ensuring clean data availability for cross-functional analytics teams.

PROFESSIONAL EXPERIENCE

Data Engineer — DataScale Solutions

May 2024 – Present (2 years 1 month)

- Designed, engineered, and automated end-to-end ETL pipelines handling 2 TB of data daily using Python and Apache Airflow.
- Optimized large-scale SQL database queries and data warehousing schemas (Snowflake), reducing report generation execution runtime by 35%.
- Containerized batch processing microservices using Docker and deployed workloads across AWS cloud environments.
- Managed collaborative pipeline source code repositories and versioning control utilizing enterprise Git.

Junior Data Specialist — RetailVibe Corp

June 2023 – April 2024 (11 months)

- Wrote custom Python transformation scripts to cleanse and ingest unstructured datasets into centralized relational databases.
- Maintained staging and production database structures using complex transactional SQL scripts.
- Monitored data quality anomalies and resolved broken ingestion workflow pipelines.

SKILLS

- Data Core: ETL/ELT Ingestion, Data Modeling (Star Schema), Apache Airflow, Snowflake.
- Languages & Tech: Python (Pandas, PySpark), SQL (PostgreSQL).
- Infrastructure & Platform: AWS (S3, Glue), Docker, Git.

EDUCATION

- Bachelor of Science in Computer Science — Al Akhawayn University (2023)
