

Frontend Engineer / UI Developer

Marrakesh, Morocco | 2.5 Years of Experience

SUMMARY

Passionate Frontend Developer with 2.5 years of professional experience building responsive, accessible, and high-performance user interfaces. Expert in modern JavaScript frameworks, responsive web design, and optimizing web performance to deliver exceptional user experiences.

PROFESSIONAL EXPERIENCE

Frontend Developer — PixelCraft Studio

March 2024 – Present (2 years 3 months)

- Developed complex Single Page Applications (SPAs) using JavaScript (ES6+) and React, improving user engagement metrics by 25%.
- Collaborated closely with UI/UX designers to translate Figma design tokens into highly reusable Tailwind CSS components.
- Integrated RESTful APIs and state management frameworks using Node.js tooling environments.
- Utilized Git daily for version control, branch management, and continuous deployment workflows.
- Wrote custom build scripts using Python to automate frontend performance testing and image optimization pipelines.

Junior Frontend Developer — WebVibe agency

November 2023 – February 2024 (4 months)

- Maintained and updated customer-facing web applications using HTML5, CSS3, and core JavaScript.
- Optimized website assets and refactored legacy code, which reduced initial page load time by 1.2 seconds.
- Conducted cross-browser compatibility testing and resolved UI bugs reported by the QA team.

SKILLS

- Frontend Ecosystem: JavaScript (ES6+), React, Redux, HTML5, CSS3, Sass, Tailwind CSS.
- Tools & Environment: Git, Node.js (npm/yarn), Webpack, Vite, Figma.
- Secondary Tech: Python (Automation), basic SQL queries.

EDUCATION

- Bachelor's Degree in Computer Science — Cadi Ayyad University (2023)
